American Association of University Women Lehigh Affiliated Group

The American Association of University Women Lehigh Affiliated Group is interested in starting a Lehigh chapter for this national organization. The mission of this group is to advance equity for women and girls through advocacy, education, philanthropy, and research. They currently have around ten members and plan to meet at least every other week. During meetings they will have discussions towards potential community enrichment activities, creating on campus activism events, and discussing current topics in the news that are related to women. They hope to invite members of the AAUW Bethlehem branch to speak at their meetings. This group is seeking Senate recognition to increase awareness of their club, receive guidance from committee members, and for potential funding.

*It is the recommendation of the Club Affairs Committee that Student Senate XXIX accept the American Association of University Women Lehigh Affiliated Group for preliminary recognition.*

American Society of Mechanical Engineers

This group was created for declared mechanical engineers. They currently have 31 members. This semester they had an event which involved touring a manufacturing plant in the Lehigh Valley. They hope to host a networking event in December for students and staff. Events they would like to have in the future include engine teardowns and participating in the pumpkin chunkin. They plan to raise their own funds with general fundraisers as well as reaching out to local engineering companies. This group is

interested in Senate recognition to increase awareness of the group, gain new members, and to stay connected with their members through LINC.

*It is the recommendation of the Club Affairs Committee that Student Senate XXIX accept the American Society of Mechanical Engineers for preliminary recognition.*
