The French Club

The French Club seeks to educate and promote French Culture to Lehigh Students across campus. Their current member list consists of 37 members comprised of first-years, sophomores, and juniors. They plan to hold bi-weekly meetings as well as host events open to all students including hosting a French dinner as well as working with other culture oriented clubs to create a multicultural event. So far, the French Club has hosted a preliminary meeting and movie screening, both advertised through University Announcements. The French Club advisor is the chair of the French department. This club seeks Student Senate recognition in order to attain more recognition among students as well as the ability to host larger-scale collaborative events.

It is the recommendation of the Club Affairs committee that Student Senate XXVIII to approve The French Club for preliminary recognition.

APPROVED

The Star Wars Club

The Star Wars Club seeks to engage students who are interested in the Star Wars movies and culture. Currently, the Star Wars Club has about 8-10 active members and approximately 22 members on their email list. This club currently hosts weekly meetings on Thursday nights where club members participate in activities such as movie nights, playing Star Wars games, and thought-provoking discussions about certain aspects of the films. One of their most recent discussions centered around the question, "How do the Prequels measure up to the other movies". This Club seeks Student Senate approval to gain more recognition on campus. This Club does not plan to use money other than to purchase new games or books.

It is the recommendation of the Club Affairs committee that Student Senate XXVIII approve the preliminary recognition for The Star Wars Club.

APPROVED

The Sports Analytics Club

The Sports Analytics Club aims to center their club on three major baseball analytics case competitions. The case competitions give students real-world problems that a general manager, for example, would face in the MLB. The Club also seeks to teach members, through the help of their advisor, how to utilize two programming languages that are commonly used in the analytics field. The club's current member list is comprised of mostly sophomores and juniors but hopes to gain first-year participants through Senate approval. The club already has a lot of interested participants and support from two academic advisors. The club also expressed that the Economic department has also expressed interested in the possibility of funding some portion of conference attendance. This club seeks approval from Student Senate to gain more members and hopefully partial funding for future conference attendance.

It is the recommendation of the Club Affairs committee that Student Senate XXVIII approves the preliminary recognition for the Sports Analytics Club.
